

## Product Description

Ceramica Tile & Grout Spray Cleaner is a non-abrasive mild general purpose cleaner ideal for everyday cleaning. Ceramica Tile & Grout Spray Cleaner will not harm marble, granite or grout surfaces unlike some acid based cleaners.

## Uses

Ceramica Tile & Grout Spray Cleaner is recommended for use as a cleaner to remove grease, stains dirt, mold, mildew and soap scum from any ceramic tile or grout.

## Application Instructions

Simply spray a light mist over the entire area, wipe the surface with a damp cloth or sponge, and then dry the area with a clean dry rag or towel.

Thorough rinsing is necessary to remove the loosened materials that the cleaner has dissolved. Improper rinsing can leave a soap or dirt film that can be very slippery as well as leaving a poorly cleaned surface.

Ceramica Tile & Grout Spray Cleaner leaves the tile and stone surface sparkling, with no streaks or residue.

## Limitations

Heavily soiled areas may require extra scrubbing.

**Note:** extremely dirty grout is usually the result of it not being sealed properly. To correct this problem we recommend that at least half the grout be removed using a grout-removing tool, followed by a fresh application of new grout. Allow a week to cure, and then seal the grout with one of our Ceramica Grout Sealers then long-term maintenance will be very simple.

## Sizes

Ceramica Tile & Grout Spray Cleaner comes in a 1L spray bottle and a handy 3.78 L refill size.
