PRODUCT BULLETIN

Product Description

Ceramica Marble & Granite Cleaner / Polish is a sea-foam coloured creamy solution formulated to enhance the colour and protect polished marble and granite surfaces.

Uses

Ceramica Marble & Granite Cleaner / Polish is a ready-to-use product for removing etching, watermarks, and dullness while restoring a mirror-like polish on large stone surfaces.
Ceramica Marble & Granite Cleaner / Polish is ideal for marble, granite, travertine, terrazzo, polished limestone, and onyx.

Application Instructions

Liberal apply a small amount of Ceramica Marble & Granite Cleaner / Polish to the stone surface then rub this liquid into the surface using a clean dry cloth. Use circular hand motions similar to waxing a car. Allow the surface to dry for about 5 minutes then thoroughly buff the surface with a clean dry cloth.

Limitations

Not recommended for use on porous surfaces.
Do not work too large of an area at one time or it will become more difficult to get the excess off during the buffing stage.

Sizes

Ceramica Marble & Granite Cleaner / Polish comes in a 1L bottle and an economical 3.78L size.
