

General Description

9801 is a brush or spray consistency bituminous prime with gilsonite additives. It has a high temperature resistance, solid adherence and good chemical resistance.

Uses

A primer for metal and non porous surfaces which yields a hard glossy finish. It provides protection of metal from atmospheric or underground chemical attack. It is used as a primer for steel tanks, ship hulls, process lines and equipment, vehicle underbodies.

Limitations

Dry film will redissolve in petroleum solvents. On exposed weathering, it will chalk and lose gloss.

Physical Properties

Colour	- Black
Weight	- .9 kg per litre or 9 lbs per gallon
Coverage	- 12 square meter per litre or 600 lbs per gallon
Dry Time	- at 50% R.H., 21 deg C Dry to Touch - 4 hours Dry to Firm -24 hours
Service Temperature	- 40 to 94 degC or -40 to 200 deg F
Shelf Life	- Up to 12 months

Precautions

Contains flammable solvents. Take suitable fire precautions. Harmful if swallowed.

Application

Apply by spray, brush or roller.
