

## Description

A white open weave glass fabric consisting of glass fibre yarn saturated with synthetic resins. The glass fibre in this product will not rot, mildew or "wick" water into the body of the coating material. Complies with CGSB 37 GP-3M and DND TS-5.

## Uses

Used as a reinforcing membrane incorporated into many types of coatings where superior strength and toughness are required.

## Physical Properties

Type	-	Woven glass mesh
Mesh size	-	20/10
Tensile strength	-	75 lbs/inch
Weight	-	Roll 8 lbs average
Length of roll	-	150 lineal feet
Width of roll	-	36 inches
