

General Description

3104 can be applied to new or old concrete surfaces, and will provide a clear, non- yellowing protective film with good durability and excellent clean ability. Good intercoat adhesion will permit re-coating after long periods under traffic. Pleasant light smell while wet.

Limitations

3104 is designed to be used as supplied. Do not alter or dilute the product; do not allow to freeze.

Physical Properties

Appearance	-	Milky white liquid, dries clear.
Density (25 ^o C)	-	1.04 kg/litre (8.7 lb/U.S. gallon)
Dry Film Appearance	-	Clear
Coverage	-	200 - 330 square feet per U.S. gallon
Drying Time (20 ^o C)	-	1 to 2 hour

Application Instructions

Make sure surface is free of oil and dirt. This can be achieved by scrubbing with a soap solution of trisodium phosphate (TSP) or a mild acid solution. After cleaning, rinse the surface thoroughly and let dry. Apply IM 3104 by spray, brush or roller. Shake well before use.

Clean Up

Tools can be cleaned up with water after use.

Packaging

Available in 4 litre (1 gallon), 20 litre (5 gallon), and 205 litre (55 gallon) containers.
