

Basic Description

A solvent based asphalt insulation adhesive of trowel consistency.

Uses

An adhesive for insulation of rigid and semi-rigid insulation to masonry, metal and other surfaces where good tack qualities required. Test before using with foam insulation to ensure it does not attack them.

Limitations

Mechanical fasteners are recommended in addition to this adhesive on the underside of ceilings, etc.

Physical Properties

Practical coverage	-	50 sq. ft./gal
Dry to touch	-	4hours@77 ⁰ F
Dry to set	-	48hours@77 ⁰ F
Colour	-	Black
Water vapour permeability	-	.018 @ 1/8" film
Temperature resistance	-	-40 ⁰ F to 250 ⁰ F
Flash point	-	100 ⁰ F
Weight per gallon	-	10.7 lb per U.S. gallon

Preparation

Surfaces must be free of frost, dust, oil, grease and other contaminates. Surfaces must also be free from surface irregularities.

Application

Cut insulation to size and prefit coat the entire surface of the insulation board at a 1/8" thickness, coverage 2 - 3 litres per square metre or 5 – 7¹/₂ gallons per 100 square feet, and press into contact insuring full contact with the base.

Caution

Contains petroleum solvents. Maintain good ventilation and keep away from sparks or open flame.
